

IQRA JAMIL

Python Developer | Frontend Developer | WordPress Developer

iqraj690@gmail.com | +92 327 1910886 | github.com/iqra-jamil

SUMMARY

Recently graduated IT professional with experience in Python and AI development. Also has hands-on experience in React.js for frontend work and in delivering projects using WordPress. Completed a four-month internship in the MIS department at Shifa International Hospital where I helped create interfaces. Built an AI-based waste sorting system as part of my Final year project using YOLO and Streamlit. Created more than six Wordpress websites for real clients. I am looking for an entry-level position where I can use my skills join the team and grow professionally.

WORK EXPERIENCE

Freelance WordPress Developer

2023 – Present

Self-Employed

- Delivered websites for paying clients in the healthcare industry in the media industry in the e-commerce industry and in the professional services industry.
- Handled projects from start, to finish: client briefs, design work, development tasks and deployment activities.
- Created Urdu news portals, clinic websites, restaurant websites and corporate websites.

Frontend Development Intern

Oct 2025 – Feb 2026

Shifa International Hospital — MIS Dept.

- Created responsive frontend screens with React.js inside the hospital MIS system.
- Developed and kept React components using Hooks for an easy to grow and maintain interface.
- Added Ant Design library to give a professional look, across all modules.
- Helped build the hospital management system: patient registration, doctor management, appointment booking and admin dashboard.

PROJECTS

AI-Based Smart Waste Management & Classification System

[FYP] [Python](#) · [YOLO](#) · [Streamlit](#) · [NumPy](#) · [Matplotlib](#)

I trained a YOLO model to sort waste into five types (plastic, glass, metal, paper organic). I created a Streamlit web app that does real-time classification has an admin panel allows for model retraining shows evaluation metrics and keeps a history log.

LLM-Powered Conversational Assistant

[Personal] [Python](#) · [Streamlit](#) · [Groq API](#) · [OpenAI API](#)

I built a multi-mode AI assistant that lets users choose different personas (General, Coding, Tutor, Creative) keeps a record of session history and has a simple Streamlit interface. I used Groq's API to get results and made sure there is strong error handling.

SKILLS

Languages	Python, JavaScript, HTML, CSS
Frameworks & Libraries	React.js, React Hooks, Ant Design, Tailwind CSS, Streamlit, LangChain, NumPy, Matplotlib, Seaborn, Pillow
AI / ML	YOLO (Ultralytics), OpenAI API, Groq API, Image Classification, Model Training
CMS & E-Commerce	WordPress, WooCommerce, Elementor
Tools	Git, GitHub, VS Code

EDUCATION

Bachelor of Information Technology

2022 – 2026

Virtual University of Pakistan

Intermediate — Computer Science (ICS)

2021

BiSE Rawalpindi
